Abhishek Yadav

MERN Stack Developer | React.js | Node.js | Express.js | MongoDB | REST APIs

+917499949407 | abhishekyadav749994@gmail.com | GitHub | LinkedIn | Bhiwandi, Maharashtra, India

Summary

MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing responsive user interfaces, scalable REST APIs, and efficient backend systems. Also familiar with Python for backend development and problem-solving. Focused on building clean, maintainable, and high-performance applications.

Skills

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST APIS
Database: MongoDB, SQLite
Programming: JavaScript, Python
Tools: Git, GitHub, Vercel, Render

Website Design & Development Intern **October 2025 –December 2025**

Full stack Development

- Developed 10+ responsive web pages using HTML, CSS, Bootstrap, and JavaScript
- Built reusable UI components using React.js and Tailwind CSS for better scalability and maintainability
- Identified and fixed UI bugs, improving overall application stability and user experience
- Integrated REST APIs and optimized data rendering for smoother performance
- Used Git and GitHub for version control and collaborative development

Projects

PDF HUB | *React + Vite, Python* **December 2025 – January 2026**

- Built a responsive web application offering 12+ PDF tools including merge, split, compress, convert, and edit.
- Developed the frontend using React.js and Vite, deployed on Vercel, ensuring fast load times and smooth UX.
- Implemented a Python-based backend API, deployed on Render, for secure file processing.
- Focused on performance, responsiveness, and user-friendly workflows for file uploads and downloads.

PulseGuard | *MERN Stack (MongoDB, Express.js, React.js, Node.js)* ***March* 2026 – *April* 2026**

- Built a MERN-based monitoring and keep-alive web application to track APIs, URLs, and server health in real time
- Developed responsive frontend using React.js with dynamic UI updates and live status monitoring
- Created RESTful APIs using Node.js and Express.js to handle monitoring tasks and user data
- Integrated MongoDB for efficient storage and retrieval of logs and uptime records
- Implemented features like automated ping checks, real-time status tracking, and alert notifications
- Focused on clean UI, performance, and smooth user experience

Education

B.Sc. Computer Science **Graduated: 2026** *B.N.N College, Bhiwandi*
